PREMIER Walls & Fencing

WE DESIGN, ENGINEER AND BUILD ATTRACTIVE, DURABLE FENCING FOR DOMESTIC AND COMMERCIAL APPLICATIONS NATIONWIDE.

Premier Walls and Fencing (PWF) is a family owned and operated company with over 20 years collective experience in the manufacturing and construction industries. Our unique product is Australian designed, engineered, manufactured and backed by a comprehensive 10-year manufacturer's warranty, see our full warranty statement on the rear page.

WHY CHOOSE A PREMIER WALL?

THERE ARE MANY REASONS TO CHOOSE A PREMIER WALL REGARDLESS OF THE SITE REQUIREMENTS

- **LOW COST.** A Premier Do It Yourself wall is under 1/3 the cost of a conventional block wall while a Premier Wall installed by one of our licensed installers is approximately half the cost of a traditional block & render wall
- **EASE AND SPEED OF INSTALLATION.** A Premier Wall can be erected in as little as 2 days and is no more difficult to install than a timber or colourbond fence.
- **LONGEVITY.** Due to the inherent strength and light weight with the use of our fibre cement construction a Premier Wall will not lean, crack and in some cases fall over regardless of soil conditions.
- **PEACE OF MIND.** With a Premier Wall you will have peace of mind knowing your investment is covered by a comprehensive 10-year manufacturer's warranty.

Lismore Design
Solid Wall: 1200mm
Slats: 600mm
Total Height: 1800mm

Minden Design

WARRANTY STATEMENT

PREMIER WALLS AND FENCING products are covered by a 10-year manufacturers faulty workmanship and/or materials warranty to the original purchaser. Pedestrian and Driveway gates, including electric/solar components are covered for a period of 2 years from the date of installation. Aluminium Powder Coated Capping and Slats are covered by a 2 year warranty from date of installation.

OUR LICENSED INSTALLERS

At Premier Walls we are serious about providing our customers with the highest level of satisfaction throughout the entire process from sale to after sales support. As part of our commitment to you, our customer we endeavour to associate our company and our reputation with like-minded installers who are equally as committed to our customers as we are. Each of our licensed installers are independent business owners and as such understand the expectations of us & our customers. Each installer has gone through an extensive training program on the installation process of our walls giving them an in-depth knowledge of our product maximising cost savings to you. Contact us for your local installer.

OUR PRODUCT

Our unique walls were designed out of necessity to produce a product that would stand the test of time in Australia's harsh environment. Manufactured from engineered fibre cement with strategically placed control joints for maximum resistance to cracking caused by soil movement and impact damage. Designed to provide many years of service in areas that exhibit filled, soft and sandy soil that will not support the weight of a conventional block and render wall but, that's not to say that a Premier Wall will not suit any site.

WARRANTY CONDITIONS

The texture coat colour applied to premier wall and fencing kit-sets must have a Light Reflective Value (LRV) greater than 40%. Refer to the texture coat manufacturer for the coating's LRV. The manufacturer's warranty does not cover damage to the wall caused by natural ground movement, it is the responsibility of the customer to ascertain the suitability of the ground prior to installation.

OTHER FENCING STYLES WE SPECIALISE IN AT PWF

PVC FENCING

PVC fencing is very popular, and for good reason – PVC is non-toxic, impervious to termites, requires no nails, won't rot, rust or splinter and comes with a 30-year warranty. Say goodbye to painting forever!

It has a fresh and vibrant look offering a stylish alternative to traditional steel and timber. Considering it's excellent longevity (especially in comparison to timber fencing), PVC offers great value for money. We are expert installers of PVC fencing and can advise on a great option for you.

COLOURBOND FENCING

Colourbond fencing comes in a range of styles and colours, Colourbond is a cost effective alternative to Modular or Hebel walls.

TIMBER FENCING

Again another cost effective fencing style with several different styles, Neighbour Friendly, Pailing, Lapped & Capped, Rural, we have extensive experience in all timber fencing styles at PWF.

HEBEL WALLS

What is Hebel?

Hebel is a strong, versatile, high performance building product made from Autoclaved Aerated Concrete (AAC). Available in blocks and panels, Hebel is easy to handle, quick to build with, and offers more flexibility with height and style. Hebel panels contain anti-corrosion steel reinforcement for added strength and are available in a range of lengths for applications including walls, floors and external cladding. Hebel walls whilst being more expensive than our modular style walls also have more flexibility with height and style, with Hebel we can go up to 2m in height where modular is limited to 1.8m and also have full height panels (no slat inserts). Hebel walls are constructed with concreted steel posts, optional concrete mow strip, rendered and painted Hebel sheets aesthetically very similar to a Besser block/concrete block wall.
